Medical Doctor Interface

Easy access from any computer for dictators, medical records Administrators and nurses to access documents and views the status of any job during the process from new to complete.

- Viewable reports are easily signed, rejected back to the transcription manager for editing or onsite editing by the dictator.
- Allows the dictator to listen to their own voice recording for any verification needed.
- MD Alert function notifies the dictator that a dictation needs his or her attention and allows the dictator to correct or respond to the issues.
- Allows printing and faxing directly from the site with easy point-and click distribution.
- Physicians do not need proprietary software (MS Word, etc.) on their computer to run the software.
- CC inbox for messaging from dictators using the platform to electronically copy doctors on transcribed report.

Phone Dictation

- 1-800# Voice Dictation System with unlimited capacity
- No additional cost to hospitals or physicians
- No busy signals to physicians dialing in.
- Instantaneous upload to the transcription platform

Voice File Upload

- Automatic upload of dictations from Olympus and all popular voice recorders.
- Free Olympus digital recorder depending on work volume

HL7 Interface

- Advanced HL7 interface engine that allows for high level patient demographic (ADT), surgical scheduling (SIU) and Radiology Orders (ORU) communication with the system.
- Real-time feeds through the system allows for more accurate and faster transcription turn-around times.
- HL7 feeds are automatically parsed and fed into the Asean Health system allowing for a full patient repository.
- Automatic transfer of patient demographics to and from hospital EMR Systems to the transcription system.

U.S. Network Operations Center

- All data kept on high speed servers fully backed up and fully redundant.
- Guaranteed 100% Data Integrity and Uptime.
- Fully redundant, high-speed connections to all major Internet backbones offering unmatched reliability. Best path technology monitors the performance of each internet connection and routes traffic across the best path providing faster and more reliable data delivery.
- Tier 1 class 24x7x365 Network Operations Center
- All service aspects HIPAA compliant.
